

# COMMUNICATIONS

*Today its more than just a phone...*

*...get the benefits of unified communications.*

**MICROSS<sup>IT</sup>**, as a **Cisco Select Certified Partner**, provide **best of breed and cost effective communication solutions to help streamline operations and improve communication and efficiency.**

## CISCO UNIFIED COMMUNICATIONS

Cisco unified communications solutions provide an integrated communications strategy and architecture, helping enable the secure combination of voice, video, data, and mobility applications within an integrated and intelligent network.

Today, business owners understand that Internet Protocol (IP) based solutions over a converged voice and data network are the best choice to replace ageing telephone systems.

## SMALL BUSINESS SOLUTIONS

The Cisco Unified Communication 500 series is an easy-to-manage platform using business-class, Unified Communications technologies to support up to 50 users via a single integrated solution.

This solution eliminates the need for multiple servers and integrates; voice, data, voicemail, automated attendant, video, security and wireless network capabilities. It also integrates with existing desktop applications such as calendar, email & CRM programs.

## BENEFITS

- Reduced 'telephone tag'
- Anytime, anywhere access to telephony features for mobile users
- Integration with core business applications
- Less travel to remote sites
- Improved customer satisfaction
- Increased responsiveness
- Greater operational efficiency
- Increased user productivity
